

## **TODD YANCEY**

Todd Yancey is a visionary leader with deep expertise in AI, Banking, Cybersecurity, FinTech, Payments, and SaaS technologies. He has a strong track record of driving high-impact global sales, services, marketing, and operations teams and his career spans startup environments, rapid growth stages, and major corporate successes.

Todd played a key role in pioneering Digital Asset Custody-as-a-Service and led the development of the Investor Services Cloud Platform™ (ISCP), a cutting-edge, zero-trust cloud-based API and database model adopted by leading financial firms like Acorns, LendingClub, and Wealthfront.

Previously, Todd managed strategic ISV relationships at IBM and SAP and served as SVP of Worldwide Sales at Instantis, which was later acquired by Oracle.

In the late 1990s, Todd played a pivotal role in solving the Y2K crisis, enhancing COBOL's capabilities, and leading Fujitsu's introduction of NetCOBOL, a revolutionary compiler that allowed COBOL applications to be deployed on the web using Java bytecode.

Todd studied at MIT, Stanford University, and Vanguard University, where he earned a Bachelor of Science in Business and Communication.
